DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by Briechle (U.S. Pat. No 5,977,998).

As to claim 1, Briechle (figs. 1-8) shows a display system for electronic label (i.e., ESL; col. 3, lines 15-24) comprising: a first display (61a) disposed on a first side of the ESL for displaying information; a second (61b) display disposed on a second side opposed to the first side of the ESL for displaying information; a memory device for storing the information to be displayed (col. 2, lines 5-17) and at least one ESL identification number (Briechle teaches about the identification of label 15 representing a unique address; col. 4, lines 35-54); communication circuitry for receiving

Art Unit: 2675

commands (note (fig. 6) the push-button 5 to receive commands from a customer; col. 4, lines 40-47); and ESL circuitry (fig. 6) for controlling the operation of both the first display (61a) and the second display (61b). See column 4, lines 15-35; col.5, lines 40-47.

As to claims 2-3, Briechele discloses an ESL, wherein an identification number is associated with both displays, and wherein both the first display and the second display the same information (col. 10, lines 34-39).

As to claims 4-5, Briechele discloses an ESL, wherein a first ESL identification number is associated with the first display and a second ESL identification number is associated with the second display, and wherein the first display displays a first information and the second display displays a second information, wherein the first information differs from the second information (col. 9, lines 4-17).

As to claims 6-7, Briechele discloses an ESL, wherein the communication circuitry receives a command from a host computer directing the ESL to display a message on the first display (col. 10, lines 19-28), and wherein the communication circuitry receives a command from a host computer directing the ESL to display a message on both the first display and the second display (col. 9, lines 4-27).

As to claim 8, Briechele discloses an ESL, wherein the ESL is mounted on a shelf rail and perpendicular to the shelf rail (see col. 3, lines 15-18).

As to claim 9, method claim 9 corresponds to apparatus claim 1. Therefore, it is analyzed as discussed in claim 1 above.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ninke (U.S. Pat. No. 3,653,001) discloses a time-shared computer graphics system having data processing means at display terminals.

Wallisch (U.S. Pat. No. 5,406,035) discloses a price-indicating electronic apparatus.

Failing, Jr. et al. (U.S. Pat. No. 5,448,226) discloses a shelf talker management system.

Goodwin, III (U.S. Pat. No. 5,473,146) discloses a system and method for connecting product information with electronic shelf displays.

Gupta et al. (U.S. Pat. No. 5,493,107) discloses a shelf price and product placement verification method and apparatus.

Briechele et al. (U.S. Pat. No. 5,864,325) discloses a technique for communicating with electronic labels in an electronic price display system.

Massaro (U.S. Pat. No. 6,543,688) discloses an electronic display for store.
